SUBJECT INDEX TO VOLUME 40

PAGE

Alfalfa plots in relation to soil and air temperature, Soil heaving in 212

Barley grown on Grey Wooded and Black soils in the Peace River Region of Northwestern Canada, Fertilizer studies with 199

Calcite in mixtures of the two, An investigation of the intercept method for determining the proportion of dolomite and
I Theoretical aspects of the rate of solution of dolomite when a number of crystals are present 219
II Experimental rates of solution of dolomite and calcite in samples consisting of a number of crystals 232

Cereals, The effect of nitrogen top dressing on yield and protein content of nitrogen-deficient 130

Clover in a greenhouse test, Phosphorus fractions in a soil sampled at different depths and the effect of lime and fertilizer on oats and 71

Clover-timothy association, Effects of varying levels of phosphorus and potassium applications on productivity, and botanical and chemical composition of a ladino 185

Conditioner (VAMA) on some soil physical properties and on growth of tomatoes, Effects of different cropping systems and of a soil 89

Corn as influenced by fertilization, The nutrient composition of hybrid
I The nitrogen percentage of leaf and grain 42

Corn plants grown in the greenhouse, The effect of nitrogen form and soil temperature on the growth and phosphorus uptake of 177

Dolomite and calcite in mixtures of the two, An investigation of the intercept method for determining the proportion of
I Theoretical aspects of the rate of solution of dolomite when a number of crystals are present 219
II Experimental rates of solution of dolomite and calcite in samples consisting of a number of crystals 232

Drainage condition on the redox potential, leachate composition and morphological characteristics of a soil parent material studied in the laboratory, The effect of .. 121

Drainage following an irrigation, Rate of soil
II Effects of determination of rate of consumptive use 15

Fertility studies, The significance of local soil types to soil 146

Fertilization, The nutrient composition of hybrid corn as influenced by
I The nitrogen percentage of leaf and grain 42

Fertilizer placement and rate of nitrogen on fertilizer phosphate utilization by oats as studied using a central composite design, The influence of 157

Fertilizers and manure, A long term field experiment with commercial
I Fertility levels and crop yields in a rotation of swedes, oats and hay ... 136

Fertilizers to permanent hayland, Effects of long-term surface applications of limestone and 28

Forage production, Nitrate-supplying power of eight grassland soils of the Kamloops, B.C., area and correlation with range 63

Grey Wooded and Black soils in the Peace River Region of Northwestern Canada, Fertilizer studies with wheat, oats and barley grown on 199

Grey Wooded soil, A comparative study of a sulphur responsive and a non-responsive 246

Hayland, Effects of long-term surface applications of limestone and fertilizers to permanent 28

Heaving in alfalfa plots in relation to soil and air temperature, Soil 212

Irrigated and unirrigated conditions, Effects of sawdust used as a mulch and as a soil amendment on soil temperatures under 207

Irrigation interval on peak flow requirements in sprinkler irrigated orchards, Effects of 99

Irrigation, Rate of soil drainage following an
II Effects of determination of rate of consumptive use 15

SUBJECT INDEX TO VOLUME 40
